SUMMARY

Software Engineer with 4 years of experience building scalable backend systems using Java, Spring Boot, and AWS. Expertise in distributed systems, large-scale data processing (30M+ records), and building and deploying AI-driven agentic workflows. Proven ability to collaborate across teams to design and deliver scalable, high-impact backend systems.

SKILLS

Languages: Java, Python, JavaScript
Backend: Spring Boot, Micro services, REST APIs, Distributed Systems
Frontend: React
Cloud: AWS (EC2, S3, Lambda)
AI/LLM: LangChain, Agentic Workflows, LLM Integrations
Concepts: System Design, Scalability, Fault Tolerance, API Design
Tools: Git, Jenkins

EXPERIENCE

Software Development Engineer 2

Autodesk

April 2024 – Present, Pune, Maharashtra

- Designed and deployed an **AI-powered Agent** using **MCP tools** to automate Fusion Admin workflows, reducing manual UI effort by **6x** in production.
- Developed scalable micro services and APIs to support cross-service communication and workflow orchestration across systems.
- Architected a distributed batch processing system using **Spring Batch**, scaling project conversion workflows to process hundreds of jobs in parallel, reducing user's on screen time by **5x**.
- Converted 1M+ projects to the new system while maintaining architectural consistency and avoiding new codebases, achieving a zero-maintenance overhead solution that ensured reliability and scalability.
- Collaborated across teams to design and integrate backend services, ensuring scalability and maintainability of systems.

Software Development Engineer 1

Autodesk

June 2022 – April 2024, Pune, Maharashtra

- Migrated legacy batch services to an **AWS-based cloud platform**, improving system reliability and scalability.
- Built and maintained backend services exposing 20+ **REST APIs** for data management and workflow automation.
- Owned a high-availability backend service, handling production incidents, **on-call support**, and improving system uptime through enhanced monitoring and recovery mechanisms ensuring 99% uptime.
- Enhanced system performance** by optimising APIs, **improving response times**, and implementing infrastructure improvements that boosted service efficiency and reliability.

Intern

Autodesk

June 2021 – June 2022, Pune, Maharashtra

- Developed backend APIs to support large-scale data operations, enabling **1K+ daily transactions**.
- Built batch processing jobs for migrating **30M+ records** with minimal downtime and high data consistency.
- Participated in technical sessions to support the continuous improvement of software performance, understanding the importance of optimisation and bottlenecks in the production environment.
- Adopted Agile development practices at Autodesk, including sprint planning, standups, and retrospectives, to deliver features iteratively and collaboratively.

EDUCATION

BTech: Computer Science and Communication Engineering

KIIT Deemed University • Bhubaneswar • 2022 • 9.6

CERTIFICATIONS

AWS Cloud Practitioner

AWS Certification Exam • 2025

- Certified AWS Cloud Practitioner with foundational knowledge of AWS services and cloud concepts.
- Understanding of AWS pricing models, billing, and cost management strategies.
- Familiar with cloud security, compliance, and shared responsibility model principles.
